PROFILE

Proficient Senior Full Stack Engineer with over 4 years of experience building dynamic web applications using a range of languages and technologies. Skilled in navigating large enterprise codebases and leading greenfield projects. Highly productive, with an ability to lead initiatives, mentor developers, and implement innovative solutions that meet stakeholder's needs and drive successful outcomes. Constantly learning and responsibly integrating AI into the development lifecycle.

SELECTED EXPERIENCE

Senior Full Stack Engineer, WEBJUMP

Atlanta

Mar 2023 — Present

- Propel development through agile sprints and large-scale initiatives, delivering applications, new features, full redesigns, and resolving complex issues
- Build dynamic, data-driven pages and feature rich components using modern frameworks like Vue and Svelte, as well as vanilla JavaScript
- Innovate development practices to deliver flexible solutions to meet evolving client needs
- Develop and maintain APIs with Python, Java Servlets, and SQL databases to support RESTful services
- Re-engineered legacy systems with modern JavaScript frameworks and optimized backend architecture to enhance performance and responsiveness
- Actively learning, sharing knowledge, and mentoring fellow developers to ensure the success of our team

Full Stack Developer, M&S Consulting

Atlanta

Jun 2022 — Mar 2023

- Utilized various modern technologies to build dynamic, API-driven applications and components
- Technical experience building applications with React, TypeScript, JavaScript, Python, SQL, CSS3, Bootstrap, and Ant Design
- Client-facing role, leading new project architecture, and contributing to large existing applications in an agile environment
- Responsible for in-depth debugging, implementing solutions, and testing new and existing features to ensure smooth deployment of client applications

Frontend / Full Stack Developer

Atlanta

Dec 2020 — Jun 2022

- Self-taught developer, focusing on building Full Stack applications using a variety of technologies including JavaScript, TypeScript, React, Redux, Vue, Angular, Node, Express, CSS, SQL, and PostgreSQL
- Well-versed in utilizing Git/GitHub for version control and cloud services such as Netlify & Heroku to facilitate CI/CD
- Constantly learning and expanding technological skill set, focusing on mastering the latest technologies and methodologies in web development
