ABOUT

Atlanta based developer specializing in the PERN stack who loves learning, problem-solving, creating dynamic content, and working with people. A strong foundation in modern web development languages such as JavaScript ES6, CSS3, and HTML5, with an affinity for creating dynamic single-page applications with React and Redux. Proficient in building responsive UI's that delight users with their functionality and a sharp ability to design pages based on wireframes. Proficient in using NodeJS to build the backend under the Express framework to create servers and route requests to manage CRUD functionality. Experience in relational databases creating and working with RESTful APIs to manage and deliver content via PostgreSQL. Extensive experience in customer service building and managing relationships.
